

Extended list of chemical resistance

About this document

The following tables cover the components of the wetted parts of ÄKTA process™ system, the most commonly used chemicals, and the chemical resistance of the wetted parts of ÄKTA process as well as other Cytiva bioprocessing systems composed of the same materials. Some of the chemicals listed may not be applicable for your system.

The listed organic solvents are included from a material point of view.

The tables are not exhaustive and are intended for guidance only.

Abbreviations

The abbreviations that appear in this document are explained below.

Abbreviation	Definition
EPDM	Ethylene propylene diene monomer
FPM/FKM	Fluorinated propylene monomer
PCV	Pressure control valve
PEEK	Polyether ether ketone
PP	Polypropylene
PTFE	Polytetrafluoroethylene
SS	Stainless steel
TC	Hygienic tubic connection

Component wetted materials

X = Component material

• = Component material for standard configuration

O = High resistance component material (optional - depends on configuration. Replaces the standard component material.)

Component	Wetted materials							Wetted materials (O-rings, gaskets, membrane)		
	Stainless steel, ASTM 316L	Hastelloy C-22	Titanium Grade 2	PEEK	PP	Glass	Oxide ceramics	EPDM	FPM/FKM	PTFE
Conductivity meter		X			X		X ¹		X	
Flow meter		X

TC gasket kit								•	O	

¹ Contains platinum.

² Valid for the valve diaphragm. The valve diaphragm material can be PTFE or FPM/
FKM depending on the configuration.

³ Valid for the pump membrane. The pump membrane material is always PTFE.

⁴ Valid for the gasket in the pressure sensor. The gasket material is always FPM/FKM.

Chemical resistance list

Green: Compatible

Yellow: Use with caution - higher wear and tear to be expected

Red: Not compatible

In the table below, the 'short term' exposure time is defined as up to 3 hours contact time at room temperature, and the 'long term' exposure time is defined as continuous usage during system operation at 4°C to 35°C.

Chemical	CAS number	EC number	Concen-tration	Exposure time	Wetted materials						Wetted materials (O-rings, gaskets, membrane)
